

# REQUEST FOR PROPOSAL RESPONSE

## BluePeak Systems

Credible mid-sized supplier with reasonable technical and delivery detail but limited security evidence.

### 1. Technical Capability

Web application using React, Python services and a managed relational database. REST APIs and SSO are supported. Scaling is described at a high level, but no capacity benchmarks or detailed architecture are supplied.

### 2. Implementation Plan

16-week implementation covering requirements/configuration, development/integration, testing, UAT and deployment. Team: project manager, technical lead and three developers. Weekly status calls are planned.

### 3. Commercial Value

Implementation INR 32,00,000; annual support INR 8,00,000. Two named integrations are included; further API integration is time-and-materials. Cloud infrastructure is excluded.

### 4. Security & Compliance

Encryption in transit and role-based access are stated. No named security certification, penetration-test evidence, data-residency commitment, incident-response SLA or detailed audit-control description is provided.

### 5. Support & Experience

Seven years' software-delivery experience and two comparable workflow implementations. High-level case descriptions are supplied, but no customer names or reference contacts.

### 6. Risks, Assumptions & Dependencies

Security assurance is insufficiently evidenced. Cloud infrastructure is excluded and additional integrations may increase final cost.

### 7. Executive Summary

Competitive commercial proposal with a workable implementation approach, but security and commercial assumptions need clarification.
