

# REQUEST FOR PROPOSAL RESPONSE

## Greenline Consulting Group

Consulting-led supplier with strong methodology and references but less detailed technical architecture.

### 1. Technical Capability

Modular business application with API integrations and configurable workflows. Supports SSO and RBAC. Database technology, infrastructure sizing, API standards and scalability benchmarks are not specified.

### 2. Implementation Plan

18-week plan: mobilization 2 weeks, discovery 3, configuration/integration 7, testing 3, UAT 2, transition 1. Team includes delivery manager, business analyst, technical architect, integration specialist and QA analyst. Formal change control is included.

### 3. Commercial Value

Implementation INR 41,00,000; annual support INR 7,50,000. Includes 400 consulting hours for post-go-live optimization. India travel is included; international travel excluded.

### 4. Security & Compliance

Secure-development practices, least-privilege access and encrypted communication are stated. No certification number, penetration evidence, detailed hosting location or incident SLA is supplied.

### 5. Support & Experience

14 years' consulting experience and four regulated-industry projects. Two anonymized case studies include scope, team size and outcomes. Named references available at final procurement stage.

### 6. Risks, Assumptions & Dependencies

Detailed infrastructure architecture and measurable security evidence are missing. Technical discovery will be important before design approval.

### 7. Executive Summary

Strong delivery methodology and relevant experience, balanced by high-level technical and security detail.
